

Isaías Chávez Martínez

SUMMARY

- 2 years of experience in web and app development with React/React Native and UI frameworks such as Tailwindcss, AntDesign MaterialUI, RN elements, and RN paper following iterative and agile methodologies. Experience with app deployment in stores and implementing complex functionalities in apps. Proficient in backend development with Nodejs, typescript, and NestJS. Experience with version managers, Git, GitHub, GitLab, and bitbucket. I am a committed, responsible, participatory person but above all, I am open to listening. I'm a very competitive person, it is the reason why I jumped to a company from the USA in a very short time.

TECHNICAL SUMMARY

Programming Languages & Frameworks: JavaScript, Typescript, Nodejs, NestJS, React Native, Reactjs, NextJS, Gatsby, TailwindCSS, AntDesign, git, github, .

Tools: Slack, Trello, Postman, Docker, Wrike, Harvest, Jira.

EXPERIENCE

INMERSYS (Oct 2020 - Jan 2021)

Web 3D / React Native Developer

- Development and maintenance of complex web 3d applications and mobile apps. Develop user management applications, online stores, and 3D applications in the browser and inside react native apps.
- I participated in the SCRUM process, providing useful input during retrospective sessions
- Participation in sessions with clients to obtain requirements and implementing them.
- Participation in the implementation of 3D technologies within React Native and its subsequent deployment in stores such as Appstore and Playstore.
- Accomplished skills in effort estimation for the implementation of new requirements.
-

Freelancer (Jun 2021 - Aug 2021)

Web 3D / React Native Developer

- I stay at my last job working on my last project. I worked as a freelancer. I made a CMS with a Store inside and I worked with technologies like Mercado Pago and Stripe.
- I was the only developer.
- I made the backend and frontend.
- I deployed all the projects.

ICALIA LABS (Apr 2022 - Actually)

Software Enginner

- I worked as a React Native developer in an app making complex animations and a lot of screens.
- I worked as a Frontend developer in a second project.
- I was part of a team from the United States
- I worked in a very structured team with all the processes of an app of very high quality like PR, and code reviews, I learned a lot from Seniors' developers.
- I worked with Google Tag Manager and GA4.
- I improved my English skills because I needed to communicate clearly
